

eResponder™

Stay active and independent with eResponder

Your life should not be limited by the range of your medical alert system. With eResponder, you can feel confident staying independent and going anywhere you want to go because you'll know you can get help if you need it.

eResponder Features:

Go anywhere: Go anywhere in the US with T-Mobile cellular coverage and get help if you need it. If you ever need to be located in an emergency, eResponder can utilize U-TDOA location technology to help find you.

No base station: eResponder is a self-contained system with two-way voice communication built in.

Simple: One button to press to talk with emergency care specialists anytime. Emergency care specialists will send rescuers or loved ones to your location, depending on what is needed.

Small, lightweight and shower-safe: eResponder weighs less than half as much as competitor devices. eResponder can be used in the shower (though not designed for submersion).

Very long battery life: eResponder's rechargeable battery lasts up to 2 months between charging, which is more than 43x longer than other emergency alert devices.

eResponder is lightweight, wearable and an affordable way for you to stay independent.
